

AccuPAP™

Pulmonary®

Quick Reference Guide

The AccuPAP™ Positive Airway Pressure Device is a great therapy to treat patients with atelectasis, or for preventative care. Check out some of these unique features:

Set the flow at 8LPM and connect the oxygen tubing.

Pressure selector can be set at 5/10/15/20 cm H₂O.

Venturi device produces ~60LPM.

Port to add a DPM for monitoring of pressures.

Mouthpiece for comfort and direct inhalation during treatment.
